

Forester's Report 2 28 2017

Two burning permits were issued during February.

Weight limit signs for City streets were put up on February 17.

The first meeting of a citizen committee working to prevent mosquito borne diseases was held on February 15th at St. Anne's Church. All those in attendance agreed that we should move forward with an active educational effort for the City. The second meeting will be on Wednesday, March 15, at St. Anne's Church. All residents are welcome to attend. The suggested timing for an educational event is during the second half of April on a Saturday morning.

Attended a Gardening for Pollinators seminar at the new Bee Lab at the U of M on February 23. The Bee Lab folks are the people that help some of the Sunfish Lake bee keepers and includes the person who spoke at a Council meeting last year regarding bees. The City's limited use of pesticides and reintroduction of native wildflowers and trees is in alignment with bee-friendly activities.
