

Forester's Report 7 2 2017

There were two burning permits issued during June. Burning permits are generally available until fall.

The sofa dumped along Salem Church Road was picked up and taken to a recycler. Please report any street side dumping to me as soon as it occurs so that it can be removed. We do not want to encourage additional dumping.

The water outlet from Sunfish Lake is partially blocked by gravel washed in during recent storms.

The Musser Park and Harmon Park walking trails were mowed and cleared of large fallen branches. Spot spraying to work toward eliminating an infestation of wild parsnip was done in Musser Park in the north meadow and along Salem Church Road. If you get the sap of wild parsnip on your skin and then expose it to sunlight, you can get severe blistering.

No new tree issues during June this year.
