

Forester's Report 7 26 2017

There was one burning permit issued during July. Burning permits are generally available until fall.

Several small areas in the central meadow of Musser Park were mowed in preparation for future seeding of wildflowers.

Another sofa was dumped along Salem Church Road and was picked up and taken to a recycler. Please report any street side dumping to me as soon as it occurs so that it can be removed. We do not want to encourage additional dumping.

Sunfish Lake has the clearest water that I remember it having in the last ten years (for this time in the summer).

No new tree issues during July this year.
