

Forester's Report 3 27 2018

There was one burning permit issued during March.

Street weight limit signs were put up on March 7.

Completed the Sunfish Lake annual emerald ash borer winter survey on March 15th and 16th. Located additional infested trees in the same general area as during winter 2017. EAB continues to expand as expected and if resident trees are showing little or no evidence of EAB damage it is still possible for residents to protect individual trees with preventative insecticide treatments.

The organizational meeting of the "Welcome to Sunfish Lake" committee will be on Wednesday, April 11, at 7 pm at the West St. Paul public library near Robert Street and Wentworth Avenue. All are welcome and recommendations for topics are encouraged.

Planning for Arbor Day on the first Saturday in May is progressing.
