Forester's Report for February 2026

Hornbeam, Sunfish and Horseshoe Lakes had no outflow during February 2026.

One burning permit was issued in February.

There have been no tree issues due to winter weather.

Our deer population count was conducted by Dakota County on February 19 following our most recent significant snow event. There were 68 deer within the Sunfish Lake city limits that day compared to 17 counted in Mendota Heights. It appears that we may have had a significant number of visitors from the west in town during the count.

The annual Sunfish Lake Arbor Day event is scheduled for Saturday, May 2 starting at 9 AM. This year we will be planting trees and shrubs along the south shore of Horseshoe Lake in a shoreline restoration effort. Two nearby neighbors have previously done shoreline restoration projects, so this is a continuation of shoreline improvements around Horseshoe Lake.
